Elad Gelerenter

Software Engineer

eladg3@gmail.com | 052-5393608 | **LinkedIn** | **GitHub**

Professional Summary

Software Engineer with hands-on experience in **Full Stack development**, specializing in **DevOps** practices. Proficient in **Angular, React, Node.js, Express.js, MongoDB,** and **REST APIs** integration, with a solid background in building scalable and responsive web applications. Experienced in **CI/CD automation pipelines** using **GitHub Actions** and **CircleCI**, containerization with **Docker**, and **cloud deployment**. Proficient in writing clean, maintainable, and production-ready code in dynamic environments.

Technical Skills

Programming Languages: Python, Java ,C#, C++, C, JavaScript,TypeScript.
Frontend Development: HTML5, CSS3, Tailwind CSS, React, Angular.
Backend Development: Node.js, Express.js, Flask, PHP, REST APIs, JWT.
DevOps & Cloud: Docker, CI/CD, CircleCI, GitHub Actions, Render, AWS EC2.
Tools & Collaboration: Git, GitHub, Jira, Qase, Postman.
Testing & QA: Jest, Pytest, Unit Testing, Integration Testing, k6, Mocha, Chai, Cypress, JMeter.
Databases: MongoDB, PostgreSQL.
Development Methodologies: Agile Development ,Automation, CI/CD workflows, Microservices Architecture.
Additional Skills: OOP, Algorithms, Data Structures, Design Patterns, Team collaboration, Problem Solving.

Experience

Work Experience

Dual Morbidity Hostel Guide | Kidum Rehabilitation Projects (September 2021 - Present)

- Coordinated daily operations in a multidisciplinary environment, ensuring stability and process continuity.
- Facilitated **teamwork**, **discipline**, and **problem-solving** in high-pressure scenarios.
- Developed strong **communication** and **leadership** skills by guiding diverse groups through structured processes.

Highlighted Projects

PawPal Network – Social Network for Pet Owners Server Repo | Client Repo

- Built a full-stack social network for pet owners using **Angular**, **Node.js (Express)**, and **MongoDB** with **JWT authentication**. Implemented **CI/CD pipelines** with **GitHub Actions** for automated **testing** and **deployment**, focusing on **responsive UI**, **RESTful API integration**, and **DevOps** practices. Developed collaboratively within an **Agile** team, applying **sprint** planning, task distribution, and continuous communication throughout the development process.

VertiClean – Treating Acrophobia Using VR Repo

- Developed a **VR-based** therapeutic system using **Unity** and **C#** to help users gradually overcome **Acrophobia** through immersive simulations. The application recreates real-world height scenarios in a controlled **virtual environment**. Designed with modular architecture and user-focused interaction logic, the project incorporated version control by **Git**, **Agile** planning, and cross-functional **collaboration** throughout its development.

Flight Site – Web Application for Booking Flights Server Repo | Client Repo

- Built a full-stack flight booking web application featuring a user-friendly interface for searching and reserving flights. The client side was developed with **Angular** and **TypeScript**, while the backend utilized **Node.js**, **Express**, and **MongoDB**. Implemented **CI/CD pipelines** and **Docker-based containerization** for efficient deployment. Applied **RESTful API** integration, responsive design, and followed **Agile** methodologies throughout the development lifecycle.

Education

B.Sc. in Software Engineering | SCE Academic College of Engineering (2021 - 2025)
Specializing in DevOps, workflow automation, and improving collaboration within development teams.

Military Service

Combat Soldier in Givati Brigade| Israel Defense Forces (2015 - 2018)
Demonstrated strong **teamwork**, **communication**, and **leadership** abilities under high-pressure situations, with proven **responsibility** and sharp risk assessment skills in operational environments.

Languages

Hebrew - Native **English** - Fluent
